FINANCING FOR THE SUSTAINABLE DEVELOPMENT GOALS: The role of fiscal reforms, revenue management and sovereign wealth funds in the extractives sector

7-8 December 2016

**Novotel Bangkok Ploenchit Sukhumvit
566 Ploenchit Road, Lumpini, Patumwan
Bangkok, Thailand**

EVENT SUMMARY

Achieving the Sustainable Development Goals (SDGs) requires financing from all available sources. Resource-rich countries have an opportunity to raise significant public finances to support the SDGs from resource extraction. However, in some of these countries, the fiscal regime, governance structures and capacities affect the scale and use of revenues from the sector.

This workshop will explore how to raise and use revenues from the extractives sector to support the SDGs, while reducing some of the negative environmental and social impacts. It will bring together representatives from governments, international and regional organizations, industry, civil society and other experts, to discuss and share experiences with fiscal frameworks applied in the extractives sector and how these can be reformed to better support sustainable development.

This workshop is organized by the [Green Fiscal Policy Network](#) - a joint partnership between UN Environment (UNEP), the International Monetary Fund (IMF) and the German Development Cooperation Agency (GIZ) – in collaboration with the UNDP-UNEP Poverty Environment Initiative Asia-Pacific. The Network and this workshop are supported by the International Climate Initiative (IKI) of the German Federal Ministry for the Environment, Nature Conservation, Building and Nuclear Safety (BMUB).

INVITED SPEAKERS

Zheng Xinye

Associate Professor, School of Economics,
Renming University, China

Vanthana Nolintha

Team leader of PEI-NERI study on impacts of mining
operations on local livelihoods in Lao PDR

Seung-Min Lee
